

Workshop on Research Data Management in Medical and Biomedical Science

This online course for the three universities of Düsseldorf, Siegen and Wuppertal is intended for **all-qualification-level (bio-)medical researchers interested in being introduced to best practices in research data management (RDM)**. The course's language is English (or German if no one speaks only English). It is hosted by ZBMED and the FoDaKo-Cooperation of the universities of Düsseldorf, Siegen and Wuppertal.

The workshop consists of **4 sessions of about 90 mins** (with room for discussion). The sessions are based on each other and attending all of them is preferred, however it is possible to partake in individual sessions. It is intended for 10-25 participants.

The idea is to combine the discipline-specific expertise of the ZBMED with an introduction to the local research data support infrastructures of Düsseldorf, Siegen and Wuppertal.
